Subject: Application for software engineer intern at DESIS Ascend Educare 2021

Dear authority,

For your perusal, I have attached my resume and other credentials along with this letter.

Currently, I am pursuing my Second Year in Computer Engineering at the Lovely professional University. Since I am a fresher in this field, I wish to work and learn under your able guidance. During my first year, I stumbled upon the domain of software development and designing, and I found myself wanting to learn more about it. I thus decided to pick up ReactJS and learn its basics and the core concepts through the resources available online. Also, I started practicing creating and deploying fully functional web apps by coding efficiently and using modern JavaScript frameworks, Styling libraries. I have created Music Player, Text-to-Speech and much more projects

And them to my github profile.

Apart from all this, I have demonstrated intermediate academic performance in all courses maintaining an 8.04 CGPA in first year. My academic study has helped me in nurturing rich domain knowledge and a comprehensive understanding of the core of Data structures and Object-Oriented programming.

Not only am I into academics, but I also enjoy participating in cultural, technical, and sports events. I love dancing, singing, and playing several sports like KHO-KHO, Volleyball, and Table Tennis. I thus believe that I am a good blend of academic and extra-curricular excellence.

In addition to my technical knowledge, I love to seek out new technologies and stay up to date on industry trends and advancements. Building user-friendly, robust, responsive, and easy-to-use web apps is truly a passion of mine and I am confident I would be an excellent addition to your organization. I believe that my time management skills, leadership skills, and my ability to be a team player as well as a team leader will help me perform justifiably in the said position.

Thank you so much for your consideration, I look forward to exchanging a few words in person.

Warm regards.

Yours faithfully,

EshikaRawat
